Junior .NET Developer

January 15, 2024 – Present

- Working on desktop and web applications using C#.NET and SQL Server
- Collaborating with senior developers for code reviews and project planning
- Maintaining and updating existing software tools and databases

PROJECTS

Final Year Project – University of Swabi

Library Management System (*Windows Forms with C#.NET and SQL Server*)

- Designed and developed a desktop-based application to manage library records, student data, book inventory, and issue/return logs.
- Used C#.NET (WinForms) for the UI, with SQL Server for backend database management.
- Implemented features like login system, book search, late fee calculation, and user role management (admin/librarian).
- Handled form validations, error handling, and report generation.
- Led documentation and testing for the project and presented it successfully in the final evaluation.

Hobbies:

- Book Reading.
- Playing Activities.
- Programming.
